SILICONE RING SCIENCE

Silicone Rings are designed to pump up your play in new ways. A ring fits around the penis, usually at the base, increasing blood flow. This keeps your erection in place longer so you can go and go and go. Cake's Silicone Rings can also be worn around both the penis and testicles for a more intense result and stronger stimulation.

- Helps delay ejaculation
- Produces harder, stronger erections
- Heightens sexual pleasure
- Rings can be used independently or with pumps to help with symptoms of erectile dysfunction

KEEP IT CLEAN | cleaning

Always clean your toy thoroughly before and after use.

To clean, use a cleaner made specifically for intimate devices such as Cake's Toy Cleaner. Alternatively, you can use warm water with mild soap and pat dry before storing. Never use cleansers containing alcohol, petrol, or acetone.

TECHNICAL DATA

Product Name: Silicone Rings
Material: Silicone

Approximate Product Dimensions:

Small: Inner diameter: 1.25 in (32mm)
Depth .04in (10mm)

Medium: Inner diameter: 1.5 in (38mm)
Depth .04in (10mm)

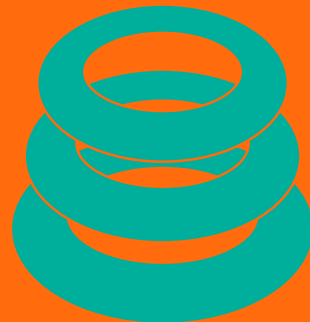

Large: Inner diameter: 1.65 in (42mm)
Depth .04in (10mm)

ADMIRE YOUR PACKAGE | introduction

Your brand new Silicone Rings are designed for more satisfying sessions and add a new element of fun! It's easy to get started but there are a few signature moves and some tips that we want you to know.

PLAY SAFELY

Every body is different, and you should always consult your doctor before beginning any new health and wellness regimen. However, following these standard recommendations will improve your chances of properly and safely attaining optimal results.

- Don't use a ring for more than 30 minutes at a time.
- The fit should feel snug but not cause pain or uncomfortable pressure.
- Remove the ring immediately if you experience pain, numbness, or unusual coloring.

USING SILICONE RINGS

Confused about how to get it on? Start with a non-erect or semi-erect penis. Stretch the ring open with your hands and guide it over the head of the penis and slide it down to the base. It should have a close and snug fit.

penis play

1. If you want extra glide, add lube to your penis, then slip the ring on.

2. Slide the ring all the way to the base.

Use a water-based lubricant to make putting on or removing your rings easier. We recommend Cake's Toy Wonder—a no drip, super slick, water-based lubricant designed for use with toys. It's ahmazing.

testicle time

For more intense sensations, or if you're using a largerring, begin by gently pushing one testicle, then other through the ring and then stretch the ring to guide the penis through.

1. Put one ring around one testicle. Add lube for comfort getting it on.

2. Push the other testicle through the ring gently.

You can also just wear the ring at the base of your testicles as a ball stretcher.

3. Bend your penis to push it through the ring.

4. Slide the ring back until it's comfortably resting behind your testicles.

double the pleasure

Mix and match rings sizes and locations for a customized experience.

1. Slide two rings over the head of your penis. Smaller one in front. Use lube as needed.

2. Stretch the larger ring around your testicles. The ring should be behind the testicles.

3. The smaller ring should be around your penis, while the larger ring will be around both penis and testicles.
